Audit & Assurance

Independent proof that your controls work

Objective, evidence-based reviews of your security controls that give customers, regulators and your board confidence. We audit against recognised standards and sector schemes, and provide clear, prioritised findings you can act on.

THE CHALLENGE

Proving security

Customers, insurers and tenders increasingly demand independent evidence.

Untested controls

Policies exist on paper, but nobody knows whether they work in practice.

Audit readiness

Certification and regulatory audits can arrive before you are prepared.

How we deliver

1

Scope

Agree objectives, audit criteria, scope and evidence needed.

2

Review

Examine documents, interview staff and test controls in practice.

3

Report

Deliver clear, rated findings with practical recommendations.

4

Assure

Verify fixes and support you through certification or regulatory audit.

ALIGNED TO ISO 19011 | ISO/IEC 27001 | NCSC CAF | Cyber Essentials Plus | SOC 2 | CAA ASSURE

Our capability

- ISO/IEC 27001 internal audits and readiness
- NCSC Cyber Assessment Framework (CAF) assessments
- Supplier and third-party security audits
- Sector schemes such as CAA ASSURE and NCSC CRA
- Control testing, evidence review and SOC 2

Benefits & value

Assurance that stands up to scrutiny, from experienced, qualified auditors.

- **Trust**: independent evidence for clients and regulators
- **Win more work**: meet tender and supply chain asks
- **Fewer surprises**: fix issues before external audits
- **Actionable findings**: prioritised, practical advice
