

Payment Security

Protect card data and meet PCI DSS

Practical support to protect cardholder data and achieve and maintain PCI DSS compliance. Drawing on extensive QSA experience, we help merchants and service providers reduce scope, close gaps and build compliance into business as usual.

THE CHALLENGE

PCI DSS v4.0.1

Future-dated requirements became mandatory from 31 March 2025.

Complex scope

Card data spreads across systems, suppliers and channels, raising cost and effort.

Compliance fatigue

Annual assessments feel like a scramble, not an ongoing process.

How we deliver

ALIGNED TO

PCI DSS v4.0.1

PCI SAQs

PCI P2PE

PCI PIN

PCI 3DS

ISO/IEC 27001

Our capability

- ✓ PCI DSS v4.0.1 gap analysis and readiness
- ✓ Scoping, segmentation reviews and scope reduction
- ✓ Self-Assessment Questionnaire (SAQ) support
- ✓ Remediation planning and programme management
- ✓ Advice on e-commerce payment pages and providers

Benefits & value

Compliance that protects your customers, not just a box-ticking exercise.

-  **Reduced scope:** less to secure, lower cost to comply
-  **Lower risk:** fewer breaches, fines and fees
-  **Customer trust:** proof that payments are safe
-  **Compliance as BAU:** stay compliant all year round
